LOGISTICA

The Logistics of Values

www.battistollilogistica.it

The **Battistoli Group's** experience in the logistics sector ensures solutions with cutting-edge facilities and the most sophisticated security systems for storage and warehousing.

For years, we have offered customised solutions for outsourcing our customers' supply chain management, with state-of-the-art facilities and the most sophisticated storage and warehousing security systems. The companies increasingly utilise advanced technological solutions in dealings with their market of reference, with the objective to remain highly competitive. Management of the supply chain outsourced to Battistoli Logistica – from the receipt of products to their storage through to the preparation for shipment – guarantees the utmost efficiency

thanks to the use of sophisticated IT and warehouse technologies. We are able to handle items of any value with complete security, from the most precious valuables to retail stock and marketing, allowing our clients to focus solely on developing their business. Flexibility in the management of peaks in work flow, real-time monitoring of stock and streams of movement, along with the optimisation of human and technological resources all allow our clients to obtain superior levels of service and to save on costs.

BATTISTOLLI LOGISTICA, AN EXTRA GUARANTEE

As a total assurance of the partnership that Battistoli Logistica establishes with its clients, in addition to physical safeguards, the security of all assets being handled is guaranteed by an **All Risks** insurance policy, stipulated by the Battistoli Group with Lloyd's of London.

AMAZON PRIME CERTIFICATION

Also as a response to the new needs of the market which, especially in recent years, has seen a dizzying development of online commerce, **Battistoli Logistica** is able to support its clients in achieving Amazon Prime certification by guaranteeing all necessary standards.

Battistolli

Battistolli Logistica, a company of the **Battistolli Group**, as a leader in the transport of valuables and security services all throughout Italy, is one of the very few operators in Italy specialised in the logistics of precious items (jewellery, goldsmithing, watches, and so on). The company avails of the Group's know-how, which is in turn made available to its clients in terms of:

- Infrastructure equipped with the most sophisticated passive safety systems
- Anti-robbery systems
- Anti-intrusion systems
- Fire-fighting systems

All these setups are constantly monitored by the Operations Centres of the **Rangers**, as another Group company operating in the security services sector.

Inbound

Phase 1

Incoming goods management

Handling products received by the client or from their suppliers, checking with the automatic sending of the balance of the order to the warehouse.

Quality check

Verification of correspondence of the quantities received along with a possible quality control.

Loading and storage system

Loading and storage system Handling processes with the scanning of each single item by means of a Radio Frequency Identification Reader.

Cross-docking

The preparation of products received from the client and from their suppliers, followed by consolidation into a single shipment.

Returns and repairs management Reverse Logistics

Receipt of products from clients, quantity and quality control, and reconditioning of returns.

Outbound

Phase 2

Management and preparation of customer orders

The receipt of orders and the preparation of picking lists.

Picking the goods

Selecting the products followed by their relative packaging, PoPs and any accessories.

Packing and packaging

Packing goods with the agreed type of packaging and the issuance of transport documents (waybills, invoices, etc.).

Preparation of shipments

Creation of the Air Waybill for the agreed carrier, labelling packages and assistance in loading the vehicle.

Customisation

Phase 3

Packaging

Preparation of products in their boxes, printing labels and other processes requested by the client.

Kitting

Preparation of kits according to the bill of materials supplied by the client.

Stamping

Marking the client's products with an official seal.

Shrink-wrapping

Packaging goods prepared for shipment with shrink film.

Warehouse management methods

- FIFO (First-In, First-Out)
The first product to enter is the first to exit.
- LIFO (Last-In, First-Out)
The product that enters last of all is then the first product to go out.

Inventory

Periodic inventories as coordinated with the client.
